

Thinking about upgrading your office phone system?

*...but don't like dealing with the big Telcos?
...and find on-premise hardware solutions
confusing and expensive?*

We did too!

When Point of Presence Technologies (PofP) needed a new phone system, we found the big Telco offerings inflexible and lacking features and hardware based PBX systems confusing and expensive. Neither option gave us a solution tailored exactly for our current and future needs.

What did we do?

We built our own! Our team thought about how we communicate with our customers, and designed a phone system with the features and reliability we needed.

Pretty soon our customers were asking us to build the same for them, and now we are making the PopTalk Hosted PBX service available to small and medium sized businesses like yours.

What is PopTalk Hosted PBX?

In a nutshell, hosted PBX means the phone system equipment runs from our secure data centre so you don't need to purchase any equipment other than phones, which we will configure and install for you. You also won't need phone lines as your voice traffic will be sent to our data centre over a dedicated network connection.

Our phone service is completely managed including initial configuration and ongoing support. You focus on your business and we'll make sure your phones are not something you'll ever need to worry about.

The PopTalk Hosted PBX service will result in lower upfront costs for you, and a fixed monthly price per employee. We do not charge

for changes or maintenance, eliminating the worry about surprise costs. All while providing you with powerful features:

Auto-Attendant. Customizable recorded greeting that guides callers on how to reach their party including dial by name.

Individual employee extensions. Including Ring Groups (ie. "Press 1 for Sales").

Conference Calling Bridge. Host free internal or external conference calls.

Single Number Reach. Have your cell phone ring at the same time as your desktop phone, reducing the odds of missing an important call. Great for people on the road.

Voicemail to e-mail. Voicemail can be retrieved over the phone and a copy will also be sent to you by e-mail.

Incredible customer service! From the no-charge initial consultation to ongoing support we'll give you professional and timely service including onsite visits as part of the fixed monthly fees. You'll know you're not dealing with a big Telco.
